Belgium, place to be

BELGIAN OFFSHORE DAYS 2022

Belgium is still one of the leading countries in the development and production of offshore wind energy. Today, Belgian wind turbines supply blue power to more than 2,2 million families. To maximize Belgians' own renewable electricity production, the federal government decided to increase the capacity of offshore wind installations in the new Princess Elisabeth Zone to 3,5 GW. Together with the existing offshore wind farms, the total offshore wind capacity in Belgium can as such increase to 5,8 GW by 2030. Furthermore, Belgium plays an important role in the future undersea connection via energy islands, exchanging power between two countries and bringing energy from offshore wind farms on land. Plans are prepared to map out and install possible routes, landing points and the placement of offshore conversion stations on an energy island by 2030.

Seen the variety of activities, the collaboration between stakeholders becomes more than ever a necessity. During the conference, this eminent collaboration between stakeholders, by means of innovative solutions beyond TRL6, will be presented by several speakers. Also, representatives and decisionmakers from the Authorities, Windfarm owners, Grid operators and the Belgian Navy will be discussing the necessity of collaboration. On the second day the evolution of Green Hydrogen in the North Sea Region will be discussed. In addition to the conference and the trade fair, B2Bs will also be organized and an interactive seminar will map out the internationalisation of the sector.

The winds of change
have never
been stronger

The new SG 14-236 DD

Safely producing clean energy has been our mission since the very beginning. Now, with a growing need to meet climate challenges, the winds of change power us more than ever. The SG 14-236 DD is the next step towards this goal: with a 236meter rotor and up to 15 megawatt capacity with Power Boost, we offer proven technology to deliver sustainable energy.

With the Recyclable Blade, Siemens Gamesa is leading the way to a sustainable future. For the first time in the industry, we are able to separate and recycle the blade materials to be used in new applications.

This is a major step towards achieving 100% recyclability of our offshore turbines.

24SEA

24SEA develops dedicated structural health monitoring systems for wind turbines. Data analysis is the core expertise. 24SEA monitors already more than 10 windfarms in Europe and Taiwan.

www.24sea.eu

ALLTERRA BELUX

AllTerra BeLux, part of the Arkance Group, is the specialist in positioning solutions and Trimble's exclusive distributor for Belgium and the Grand Duchy of Luxembourg.

www.allterra-belux.com

AERTSSEN

aertssen

Aertssen Kranen is the renowned partner for heavy lift operations with mobile cranes, lattice boom crawler cranes and jacking systems as well as SPMT related transport in a safe, well-prepared method.

www.aertssen.be

ANMA-TECH BELGIUM

AnMa-TECH is a solutions provider for bolted connections. We supply hydraulic, pneumatic, electric and battery operated bolting tools.

www.anma-tech.com

ALL WORKS AT HEIGHT

A.W.A.H. is a Belgian Rope Access company that specializes in carrying out works in hard to reach places using industrial rope access techniques.

www.en.awah.be

BLAUWE CLUSTER

The Blue Cluster is encouraging companies, public institutions and centres of excellence to work together to develop and promote sustainable economic activities related to the sea.

www.blauwecluster.be

BIARDO SURVIVAL SUITS B.V.

BIARDO SURVIVAL SUITS B.V. is a provider of personnel safety equipment in the Offshore Wind industry. We supply, rent-out and maintain Survival Suits, Lifejacket & PLB's.

www.biardo.com

BOM-BE

Remediation Unexploded Ordnance (UXO): preliminary research, data & risk analysis, project management, certified courses for divers.

www.bom-be.be

BOSCH SECURITY AND SAFETY SYSTEMS

BOSCH
Invented for life

Bosch ruim 130 jaar kwaliteit en betrouwbaarheid. Bosch Security and Safety Systems is een internationaal toonaangevend technologisch bedrijf voor beveiligings-, veiligheid en communicatieoplossingen

www.boschsecurity.be

C-VENTUS OFFSHORE WINDFARM SERVICES

C-Ventus Offshore Windfarm Services is a dedicated service provider with specialist knowledge in offshore windfarm installation, inspection, repair and maintenance (IRM) and decommissioning.

www.c-ventus.com

CATHIE

CATHIE

We deliver geological, geospatial, geophysical and geotechnical engineering solutions for a wide range of offshore and near shore industries, including wind, oil and gas, marine energy, ports and subsea cables. We offer innovative, cost-effective solutions to clients all over the world by managing seabed risk and solving technical challenges.

www.cathiegroup.com

DEME OFFSHORE

DEME Offshore provides the most comprehensive & innovative solutions in the renewables industry. By operating a high-tech fleet we help customers achieving the most demanding offshore energy projects.

www.deme-group.com

DEUTSCHE WINDTECHNIK

Deutsche Windtechnik offers a single-source full maintenance package for wind turbines. 4,800 plants of all leading technologies are serviced as part of permanent maintenance contracts.

www.deutsche-windtechnik.com

DHSS

DHSS, an experienced company with a demonstrated history of working in Offshore Renewable Energy Industry and based in all strategic ports in the Netherlands.: Ships Agency - Helicopter Logistics.

www.dhss.nl

EAGER ONE

Eager.one has over 40 years of experience in heavy lifting and transport. We design lifting methods, seafastening, and construct, test and supply certified wind farm lifting and handling equipment.

www.eager.one

e-BO ENTERPRISES

Inspiring and supporting you to complete your IT & OT challenges through the most advanced solutions and services. We care about delivering trust for your critical business, and especially for wind energy, making our planet a cooler place to live..

www.ebo-enterprises.com

ECCO NOVA

Investment of sustainable projects for the energy turn.

www.econova.com

ENDIPREV

Endiprev provides commissioning, maintenance, test & validation services, on onshore and offshore wind turbines, with +5GW of commissioning, +2GW of maintenance experience in more than 30 countries.

www.endiprev.com

EMPTEEZY

EMPTEEZY
working for the environment

Empteezy will be showing examples from its containment boom range along with spill kits and absorbents. Whatever your spill containment or spill control requirement we can help.

www.empteezy.be

ENERGYST RENTAL SOLUTIONS

As a subsidiary of caterpillar and its dealers, we have a vast experience and an in-depth understanding of the temporary power and temperature control needs of wind farms.

www.energyyst.com

ENGIE LABORELEC

Since its creation in 1962, Laborelec has been a center of expertise integrated within a larger utility company. Our main mission has always been to help our parent company manage its assets in a sound manner and find cost effective solutions. In recent years, the company has opened up to third parties, and it is now proud to put over 50 years of expertise at the service of a much wider range of customers to reduce the total cost of ownership of their facilities.

www.laborelec.com

EQUANS

EQUANS Offshore Division is an integrated solutions provider that offers a full range of value added services from fabrication to complete turnkey solutions of Offshore High-Voltage Substations to monitoring and maintenance of complete windfarms.

www.equans.be

ETE LOGISTIXX

The union of these GRUPO ETE and STEELDUXX brings together to your business, the right people, assets and extensive know-how in delivering state of the art solutions for your cargo.

etelogistixx.com

OFFSHARE

A new form of offshore collaboration that connects people, data and processes on a secure and centralized software platform from e-BO Enterprises. Efficient processes, valuable insights and minimized risk, all by working together with every party involved.

FREUDENBERG (EAGLE BURGMANN BELGIUM)

Freudenberg is a global technology group that strengthens its customers and society long-term through forward-looking innovations.

www.fst.com

G4S

Securing Your World

G4S is a knowledgeable safety partner for the wind industry, onshore and offshore. Count on our wind safety supervisors, equipment and drone technology to secure people's safety every step of the way.

www.g4s.com

FUTURE SERVICES INT

Inspection and maintenance company specialized in hard to reach locations (ie offshore, industry, at height and in confined spaces) by use of rope access and drones.

www.futureservices.eu

GEO TECHNICS

GEO TECHNICS offers operations & maintenance services to offshore renewable energy. Our superior standard of equipment, service and safety makes us the O&M provider of your choice for unplanned, planned or condition based tasks.

www.geometalworks.com

GEOXYZ

WWW.GEOXYZ.EU

GEOxyz is an independent company specialized in hydrographic, geophysical & geotechnical and topographical surveys, site investigations, offshore renewable energy support and crew transfers.

www.geoxyz.eu

HERBOSCH KIERE

Founded over a century ago, Herbosch-Kiere is specialised in river, port and coastal projects. Its specialty areas include the demolition and rebuilding of quay walls, bridges, locks and jetties, as well as dredging and salvage projects.

www.herbosch-kiere.be

HOPPE MARITIME GROUP

Hoppe Maritime Group is specialized in port agency, husbandry, forwarding, warehousing, customs and crew shunting for the offshore services in Oostende and Zeebrugge.

www.hoppegroup.be

HYDAC

for more than 55 years worldwide the leading specialist in hydraulic components and electric and hydraulic drive- & control systems.

www.hydac.nl

IPC-GROUP

Coatings, protective paintings and anti-corrosion treatment are the core of our business. With these applications IPC Services extend the operating life of materials, installations and buildings.

JAN DE NUL NV

Design. Build. Connect.
Jan De Nul Group shapes water and land. From complex offshore services, over large dredging projects, to challenging civil construction programmes.

www.jandenul.com

ISEC

ISEC, - Industrial Safety & Emergency Consult is a niche-player in the world of Safety & Emergency Training and consultancy, respected for its outstanding training quality. GWO and IRATA approved.

www.isec-online.be

JOHN COCKERILL

A wide range of services in maintenance of wind turbines, scheduled and unscheduled maintenance, fault finding, troubleshooting, commissioning, reliability and availability analysis, assessment after.

www.johncockerill.com

K2 PROFSHOP

K2 Profshop

Specialized store for all equipment for working at height and rescue. Main brands: Petzl, Skylotec, Camp, Skedco, Kong Frog, Mullion, Ursuit. Cresto Smartline-X partner. Also for trainings !

www.k2profshop.be

MARLINKS

Marlinks monitors offshore power cables, focusing on burial depth measurement and continuous risk assesment.

www.marlinks.com

MARITIME ANTWERP SERVICE

M.A.S.

Maritime Antwerp Service

Supplier of JFC demarcation, mooring and data bouys from 1,2 to 3 m diameter, complete with lights and optional AIS.All electrical maintenance, repair, automation and newbuilding projects.

www.maritimeantwerpservice.be

MUEHLHAN

Muehlhan Wind Service (MWS) is a full-scope contractor and supplier of specialized and "best-in-class" Wind turbine technicians as well as Installation- and Service solutions.

www.muehlhan.com

NAVIKON

Navikon specialises in services for the wind energy sector by providing seafastenings, grillages, foundations and mobilisation/demobilisation of wind turbine installation vessels.

www.navikon.pl

NORD-LOCK BENELUX

The Nord-Lock Group is a world leader in bolt securing systems. Our unique combination of innovative products and expertise enables us to solve the toughest bolting challenges.

www.nord-lock.nl

NEP BELGIUM NV

NEP Belgium is a leading service provider in the European broadcast market.

www.nepgroup.be

OMNISAFE

Omnisafe is a specialist in personal protective equipment. We ensure greater safety on the work floor by providing suitable, high-quality PPE. This after correct advice from our representatives. Our goal is that employees can work efficiently, with peace of mind, and to relieve the employer of his worries by offering a complete safety concept from head to toe.

omnisafe.be

OSTEND SCIENCE PARK

The first and most innovative science park in marine and maritime business.

www.ostendsciencepark.be

OWILAB

OWI-Lab is a Belgian (offshore) wind energy knowledge and expertise center set-up in 2010 and is managed by the wind energy RD&I groups within Sirris, VUB and UGent.

www.owi-lab.be

OTARY

Otary develops, finances, constructs and operates offshore wind farms and provides a broad range of services during the project life cycle. Otary has realized Rental and SeaMade OFW, 800MW in total.

www.otary.be

PANDUIT

Panduit is a global innovator of solutions for connecting, grounding, securing, protecting and identifying. Our solutions are known for time-savings features while exceeding performance and safety.

www.panduit.com

PARKWIND

Parkwind develops, finances, builds and operates offshore wind farms. It will soon reach 771 MW of operational capacity in the North Sea and has 577MW under development in Germany and Ireland.

www.parkwind.eu

POM WEST-VLAANDEREN

POM West Flanders presents its new maritime innovation and development platform Blue Accelerator, available for all your test projects, and helps you find partnerships in the blue industry.

www.fabriekenvoortetoeekomst.be

P-LASER

P-Laser develops and produces the world's most advanced industrial laser cleaning equipment for manual and automated use. Precise, cost effective and clean.

www.p-laser.com/

PORT OOSTENDE

It is the aim of Port of Oostende to excel in Blue Growth by offering dedicated port facilities, infrastructure, support in research and development and an extended business network to both national and international companies.

www.portofoostende.be

PROPHESEA

PropheSea creates value by developing custom predictive software. Our predictive software can be data-driven, building upon state-of-the-art machine learning technology, or by solving mathematical equations. We guide you from proof of concept to production, accelerating your business.

www.prophesea.eu

PROTECTA SOLUTIONS

Protecta Solutions, founded in 2007, offers solutions for storage, use and cleaning up of hazardous materials. We help you transform your company into a safe and clean working place.

www.protectasolutions.be

RELYON NUTEC

We provide safety and survival training and services, helping organisations in oil and gas, maritime, wind and industrial, improve safety for their employees and their customers.

www.relyonnutec.com

RÉSEAU JADE

21 years of experience with work in difficult access areas and with the installation of safety systems, training PPE distribution.

www.reseau-jade.com

SARENS

Sarens combines tradition, global spirit, excellence and experience with safe solutions. We offer a 1 stop shop logistics service to our offshore clients.

Nothing too heavy, nothing too high.

www.sarens.com

SEARENERGY

SeaReEnergy is an independent provider of comprehensive services for all offshore wind industry stakeholders. We are involved in the whole value chain from T&I concepts to operation & maintenance.

www.searenergy.com

SCOTTISH DEVELOPMENT

Scottish Development International is Scotland's trade and foreign direct investment agency. We offer free and confidential one-to-one support to connect you to opportunities and facilitate successful trading relationships with Scotland. You'll have access to our industry experts as well as our excellent infrastructure of suppliers, industries and networks.

www.sdi.co.uk/key-sectors/energy-industries

SKYWORKERS

SkyWorkers specialises in working at heights, depths and hard to reach areas by means of industrial rope access. Our company is VCA-P certified and all our personnel are IRATA certified.

www.skyworkers.be

SMULDERS

Smulders is an established market leader that offers a full range of services from engineering and fabrication to the complete turnkey solutions (EPC) of substations and foundations.

www.smulders.com

STEMA-SYSTEM

TECH-SOLUTIONS

Tech-Solutions offers electro technical overall solutions in the maritime sector.

www.tech-solutions.be

TENNECO DEVA

DEVA bearings move the world

With innovative high-tech products, materials and technical know-how, we develop tailor-made self lubricating, maintenance free and long lasting slide bearing solutions for your application in the offshore wind and industry

www.tenneco.com

THINKPROJECT

thinkproject

Thinkproject is a global leader in construction intelligence. Our secure, cloud-based solutions support the entire project lifecycle. We connect people, teams, processes, information and systems across company boundaries. Our digital technologies unlock the potential of people and information to help construct a better world.

www.group.thinkproject.com

UXSOLUTIONS BVBA

UXSolutions is a trusted UXO company with a proven track record in the field of offshore UXO remediation.

www.uxsolutions.be

TRACTEBEL ENGIE

Tractebel offers multidisciplinary and advisory services in energy, water, nuclear & urban. We provide solutions for the entire life cycle of your renewable projects.

www.tractebel-engie.com

VAN MEEUWEN LUBRICATION

Leading companies in the offshore, dredging, port and crane sectors use Van Meeuwen's (biodegradable) high performance lubricants for maximum safety, sustainability and reliability.

www.marine-offshore.vanmeeuwen.com

VESTAS

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install and service wind turbines across the globe, and with +145 GW of wind turbines in 85 countries, we have installed more wind power than anyone else

www.vestas.com

VIKING LIFE-SAVING EQUIPMENT

VIKING is a global market leader in maritime and offshore safety, providing safety solutions and services for passengers and cargo ships, offshore assets, fishing vessels, the navy, fire departments.

www.viking-life.com

VVC EQUIPMENT

VVC Equipment is a leading supplier of materials for construction, industry, offshore and yachting. Our range consists of steel wire, rope, paints, lubricants, nets, PPE, clothing and much more!

www.vvcequipment.be

ZINGAMETALL

Zingametall is the manufacturer of ZINGA, a one component zinc rich coating or "Film Galvanizing System" containing 96% atomized zinc (powder) in its dry film to protect steel from rust.

www.zinga.eu

WITTEVEEN+BOS

Witteveen+Bos' engineers and consultants possess an intrinsic drive to resolve complex issues and help society to progress.

www.witteveenbos.com

V236-15.0 MW™

World-class technology, industry-leading experience

The V236-15.0 MW™ is powerful proof of our commitment to offshore wind. State-of-the-art technology based on proven system designs and industry-leading experience. It is efficiently designed, globally applicable and engineered for optimum park performance.

Discover more at vestas.com/offshore

Wind. It means the world to us.™

DEME Offshore is a leading provider of services and solutions for the offshore wind industry. We provide foundation, cable, turbine and substation installation, as well as maintenance and repair solutions. We design and deliver these solutions under Transport and Installation (T&I), Engineering, Procurement, Construction and Installation (EPCI) or Balance of Plant (BOP) contracts. We have the skills, technology and a high-tech fleet of vessels to perform in the most challenging marine environments. Always working closely with our customers, we understand what it takes to deliver a project cost-effectively, safely and on time.
